What is Apprenticeship?

Apprenticeship is a well-organized and supervised training method we use to enable people with little or no prior knowledge of our craft or trade to become qualified journeymen. It is an "earn while you learn program" as the on-the-job portion of the training is a full-time commitment.

- 1. The apprentices are employed under a union contract, which includes regular wage increases and diversified training.*
- 2. You are paid good wages while you learn*
- 3. You will gain experience using the most modern practices*
- 4. You will work under the direction of a competent Journeyman who will teach you the trade in the shop and at the job-site. You will receive close personal attention*
- 5. You will attend evening classes a minimum of six (6) hours each week, and one (1) or more Saturday classes per month to receive technical instruction related to our trade. This is one reason for our high academic entrance requirements*

Career Description

The Sound and Communications Installer Program requires moderate physical effort on the part of the apprentice. Most all of the work day is spent working on one's feet, climbing and working from ladders, crouching, bending, pulling, and pushing. Fine work with one's hands requires manual dexterity. The apprentice must also possess the ability to follow specific directions, especially safety instructions. Most of the work is indoors, but some will be outdoors exposed to environmental elements.

We Are Selective

We are seeking men and women of all races who demonstrate the best character, aptitude, motivation, and traits conducive to success in our trade. Employers and Union Representatives who make up the JAC, interview all qualified candidates in an effort to select only the best candidates.
